

ST08

ST08

Intelligent Automotive Detection Tool

Scan for more information

ST08 is an intelligent automotive detection tool tailored for the passenger car ADAS calibration main frame.

- Matching multiple products
- Realize equipments interconnection
- Wide coverage of vehicle models
- Strong diagnostic function

Features

1. Press the pop-up VCI connector, not easy to lose;
2. Covering more than 95% of the world's models equipped with ADAS system calibration, and continue to update;
3. Automatic identification of VIN code, quickly enter the calibration function;
4. The topology map shows the scanning results of the ADAS system, and the vehicle condition is clear at a glance;
5. Provide ADAS calibration graphic tutorial and step guidance;
6. Output comparison report before and after ADAS calibration;

Functions

- 1. ADAS Calibration:** Supports ADAS system calibration for many models in Europe, America, Asia and China, compatible with ADAS PRO+, ADAS MOBILE, ADAS LITE and ADAS RADAR 3IN1.
- 2. ADAS Report:** Provide professional ADAS calibration reports, showing the data comparison of before and after ADAS calibration.
- 3. ADAS Model Database:** Support to query ADAS measurable vehicle data by vehicle type and target.
- 4. ADAS Demonstration:** A demo version of ADAS calibration software is available.
- 5. Vehicle Detection:** Support code reading, code clearing, data flow, action test and special functions and other full-system full-function testing.
- 6. Software Upgrade:** Support model software, firmware software, APP software online upgrade.

Parameters

CPU	4 Core 1.8GHz	Resolution	1280×800
System	Android	Camera	8MP
Memory	4GB	Wi-Fi	2.4GHz/5GHz
Storage	64GB	Working Temperature	0~45°C
Display	8 inch	Storage Temperature	-10~60°C
